

## MLB Multi-Team Players

December 26, 2014

Using Sean Lahman's Baseball Database <http://www.seanlahman.com/baseball-archive/statistics/> I created a query to identify those players (from 1871 to 2013) that had multiple stints in a specific season. The file contains a straight list with the count of multiple stints for each player. There is another file that shows the team names for each stint number.

Each file also shows the number of total games based on the combination (all stints or each stint).
